Remote

- Provide API support to make company's website with Golang Fiber web framework and Go testing. This API is for both website and mobile application .
- Apart from API developing, I have provide support in various backend query and worked with Mongodb.

PROGRAMING LANGUAGES AND DATABASES

- Python: (flask , Beginner level - ML, & Data Science)
- JavaScript: (Node.js , Express.js)
- Go: (Web Frameworks)
- Java , Git , MySQL , MongoDB:
- Postman , Rest API:

PROJECTS

ReaderList (Javascript) :

https://github.com/DhruvMehta-code/readerlist

An extension , built using javascript to overcome problem of bookmarks . By creating this project , I have learnt about manifest.json file & chrome api.

REST API (Golang/gin-gonic) :

To practice web development in Golang , I wrote code in gin- gonic (golang web framework) to get some knowledge about REST API & how it's work in golang

To-Do list (Python/Flask , Sqlite) :

https://daytodaytask.herokuapp.com/

To-Do list website using flask micro web framework written in Python , I have also listed this website using Heroku . By creating this project , I learnt about flask along with sqlite database .How crud operation works in sqlite using sqlalchemy database toolkit.
